sub-classes.

- Anapsida
- Parapsida
- Diapsida

Anapsida :-

- The dermal bones form a complete roof over the skull with no temporal fossae.
- These are sub-divided into Cotylosauria and chelonians.
- Modern chelonians are classified according to the method of attachment of the head in the shell.
- Turtles, tortoises, and terrapins belong to this group.

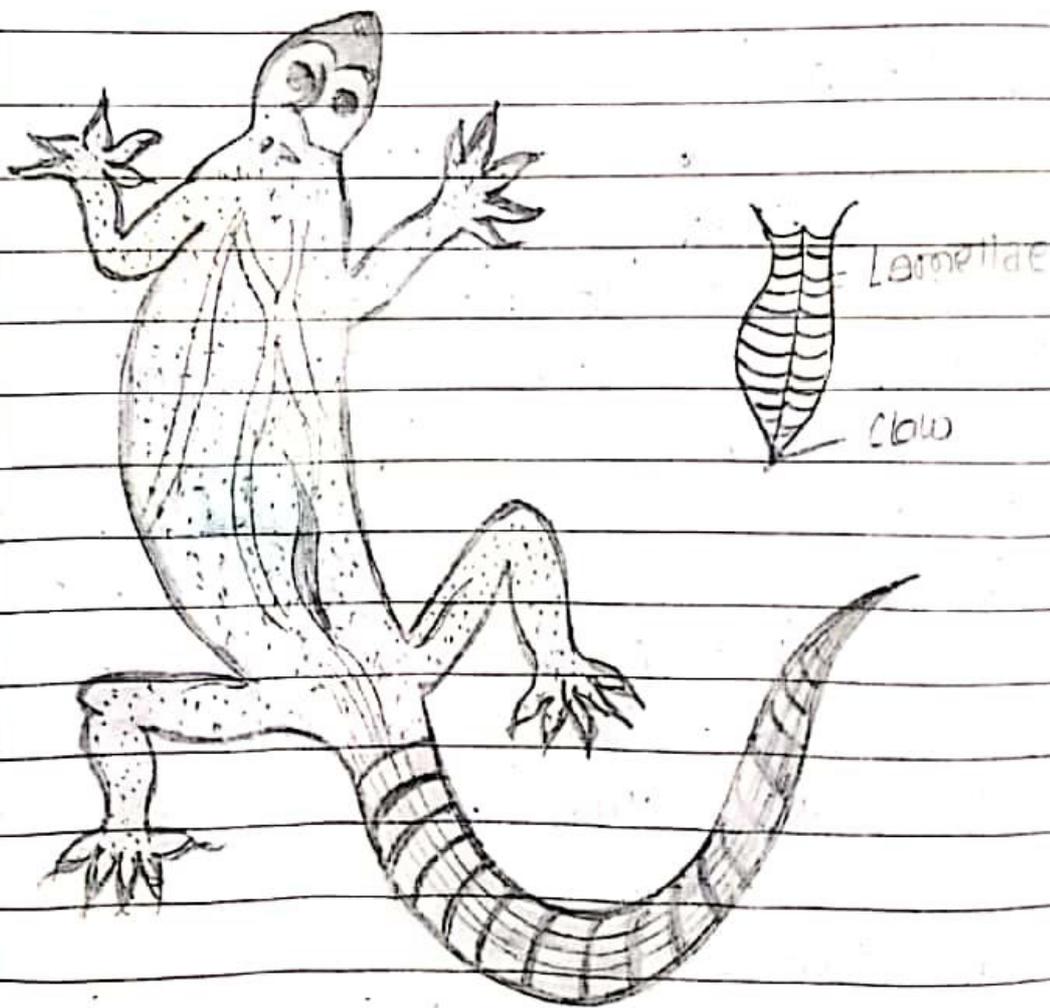

Parapsida :-

- These reptiles possess one temporal fossa present high up on the skull.
- Protosaurs, Nothosaurs, placodonts showed this type of skull.
